Trackman® for CASE IH

Rubber Track

We are covering new ground with our aftermarket lineup for the Case IH tractors: Quadtrac® STX, Quadtrac® Rowtrac™, Magnum Rowtrac™, Combine Harvester and New Holland T5 Rowtrac™

From the introduction of the Case IH Quadtrac®, we have advanced positive drive tracks incorporating our racing-tested Continental Elite® positive drive technology, our in-depth rubber compounding knowledge, along with our decades-long track experience to build industry-first track durability.

Standard agricultural tracks

- › Fully molded tread lugs, drive lugs and carcass for increased tear-off resistance.
- › State-of-the-art rubber compounding technology.
- › Designed for the demands of a Positive Drive System.
- › Patented galvanized cable reinforces construction delivering improved tracking and added strength on 9300 and STX.

ARMORLUG® technology

- › ARMORLUG® state-of-the-art reinforcement material is incorporated in the ARMORLUG® track construction to help you deal with the severe demands you face every day.
- › Field tested with 23% track service life improvement versus standard production tracks.
- › ARMORLUG® technology takes Positive Drive applications to the next level.

The Quadtrac® undercarriage relies solely on Continental ContiTech for these critical rubber components: rubber mounts, roller wheels, bump stops and idler wheels.
