Trailed Track System (TTS)

TTS speed and model changes for 2020

Camso has changed model numbers and increased speed limitations to 20 mph on 5 TTS models for the 2020 model year. Please see below for the current 2020 TTS models and approved speeds verses weight chart. This will also be added to all TTS Operator & Maintenance Manuals.

	Maximum Speed vs Allowable Weight on axle with TTS systems installed

Note 1: Max. allowable weights shown above include the weight of the track systems installed.

Note 2: Ratings based on 2 hrs of continuous operation.

Note 3: Exceeding speed and/or weight limits can cause damage to tracks and undercarriage components.

Note 4: Avoid driving on shoulders of road. Tracks should always be fully supported on road surface.

If you currently have a TTS model 35-2211, 35-2511, 40-2512, 40-1511, or 45-1815 and would like to upgrade to be 20mph capable, a retro fit kit will be available through our Customer Service Store. The kit will consist of High Temp midroller seals and midroller seal installer. The new tracks for 35-2212, 35-2512, and 40-2513 must be purchased separately. The 40-1512 and 45-1816 models keep their current tracks.
